

DuplexPro®

The New 2-in-1 Spraybooth Extract Filter

The 2 in 1 DuplexPro® Synthetic Extract Filter eliminates the need for two separate filters in the extract system. Manufactured using recycled synthetic fibres, DuplexPro® is specifically designed to optimise air flow, whilst maintaining paint holding capacity.

2in1

One filter with two functions - replaces glass fibre & synthetic

Free from glass fibres, making it safer to handle

Higher holding capacity compared to glass-fibre

Sustainable and environmentally friendly

Lasts longer than traditional 2 stage filters

DuplexPro®

One EPA compliant filter that replaces the traditional glass fibre and synthetic combination, whilst maintaining filter efficiency.

DuplexPro® lasts longer than traditional glass/synthetic combination filters.

Lab tests have shown that DuplexPro® holds more particulate than traditional glass-fibre filters.

A fully recycled product - made from 100% recycled plastics.

DuplexPro® is an environmentally sustainable product made without harsh chemical processes.

Free from glass fibres means it is safer to handle, reducing irritation, and does not require additional PPE to be worn during installation.

Installing DuplexPro® saves time when replacing filters.

Zero shedding with DuplexPro® reduces paint contamination and cabin debris.
